

Current homepage for GALILEO:

The screenshot shows the GALILEO Scholar homepage. At the top, there is a navigation bar with the GALILEO Scholar logo and the text "An Initiative of the University System of Georgia". To the right of the logo are links for "Home", "About GALILEO", "Contact Us", and "Help". Below the navigation bar is a banner that reads "Georgia's Virtual Library...bringing quality content to you!".

The main content area features a horizontal menu with five tabs: "Browse by Subject", "Browse by Type", "Databases A-Z", "Journals A-Z", and "Search". The "Browse by Subject" tab is currently selected. Below the menu, there is a section titled "Select a subject from the list below:" followed by a grid of subject categories, each with a small icon and a link. The categories include: Arts and Humanities, Business and Economics, Company and Industry Information, Education, Engineering, Georgia, Government Information, History, Literature, Language, and Literary Criticism, Math, Medicine and Health, Science and Technology, Social Sciences, and Spanish/Español Resources.

To the right of the subject list is a "Getting Started" section with a list of links: "What can I do in GALILEO?", "Choosing a database", "Finding a peer-reviewed article", "Have a citation?", "Computer configuration tips", and "GALILEO Beta: more info". Below this is an "About Emmanuel College" section with links to "Shaw-Leslie Library" and "Emmanuel College Library Catalog".

Further down is an "In the Spotlight" section featuring the "Merriam-Webster's Collegiate Dictionary" with a small image of the dictionary cover and a link to "more >". Below that is a "GALILEO News & System Alerts" section with a link to "News & System Alerts".

At the bottom of the main content area, there is a "Tips to help you get started:" section with a numbered list of three steps: 1. Select a subject area from the list above. 2. Select an associated subject category from the menu. 3. You will be taken to the search screen for your chosen subject category. Enter a search, or choose another tab to see content related to that subject: Articles and Databases, Journals, Other Tools, and Books and More.

The browser window shows the address bar with the URL "http://www.galileo.usg.edu/scholar/emmanuelcollege/subjects/". The taskbar at the bottom includes the Windows Start button, several open applications (Inbox - Microsoft..., 3 Reminders, Browse by Sub..., GALILEO help p...), and the system clock showing 12:25 PM.

To do a quick search:

1. Click on the word "Search" on the yellow tab. This will take you to the main search page.

The screenshot shows the GALILEO Scholar search page. The browser window title is "Search - Mozilla Firefox" and the address bar shows "http://www.galileo.usg.edu/scholar/emmanuelcollege/Search/". The search bar contains the text "countering the new testament".

The main content area features a horizontal menu with five tabs: "Browse by Subject", "Browse by Type", "Databases A-Z", "Journals A-Z", and "Search". The "Search" tab is currently selected and highlighted in yellow. An arrow points from the "Search" tab in the previous screenshot to this tab.

Below the menu is a section titled "Search multiple databases at one time". It contains three numbered steps:

1. Enter search keywords. This step includes three input fields, each with a "Keyword" dropdown menu and a search button. A "Tips!" box to the right provides instructions: "Use 'and' to narrow your search.", "Use 'or' to broaden your search.", and "Use 'not' to eliminate a word."
2. Select search options. This step includes two checkboxes: "Full-text search (only returns articles that may be read online) help" and "Peer reviewed (articles reviewed by experts) help". Below these are radio buttons for "All dates" and "From: 2008 To: 2008".
3. Choose databases to search. This step includes a "Recommended Databases" section and a "Tips!" box.

The browser window shows the taskbar at the bottom with the Windows Start button, several open applications (Inbox - Microsof..., 3 Reminders, Search - Mozila..., Cataloging: Eri..., Document3 - Ml...), and the system clock showing 11:00 AM.

2. On that page, enter your keywords (follow tips listed in the right column of the search page)
3. If you are looking primarily for scholarly journals, click the boxes labeled: “Full-text search (returns only articles that may be read online)” and “Peer reviewed (articles reviewed by experts)”
4. If you wish to search only in the “recommended databases,” use the “Search 3 databases” button at the bottom of the screen, or simply press the “enter” button on your keyboard. The results will give you the number of items found in these three databases: Encyclopaedia Britannica, Academic Search Complete, and Research Library. (If you don’t want results from one of the databases, simply remove the check mark from the appropriate box by clicking on the box.)
5. On the results page, clicking a database name in the left column will reveal the first 10 search results for that database.

Clicking VIEW will create an html page of the article selected. Clicking VIEW PDF will create a pdf file. Either type of view will include the full citation of the article.

“Browse by Subject”

To “Browse by Subject” from the main Galileo page click on the subject category you need. Doing so will reveal an expanded “subject box” with more specific subject headings. Choose a heading you want and this will take you to the search screen. The listing of databases at the bottom of the screen will align with the subject heading you have chosen. NOTE: You always have the option of searching additional databases by clicking on “show more databases” (directly under the listing of databases).

To get complete texts of articles relating to your research, make sure you ALWAYS click on “Full-text search.”

“Browse by Type”

If you wish to browse a specific publication type, click on the “Browse by Type” tab (in the yellow bar at the top of the screen), then make a selection from the list presented:

- [Almanacs](#)
- [Archives and Primary Sources](#)
- [Articles and Databases](#)
- [Biographical Sources](#)
- [Books, E-Books, and Book Reviews](#)
- [Conference Papers and Proceedings](#)
- [Dictionaries](#)
- [Digital Collections and Repositories](#)
- [Directories](#)
- [Dissertations and Theses](#)
- [Encyclopedias](#)
- [General and Multi-disciplinary Resources](#)
- [Images and Maps](#)
- [Indexes and Tables of Content](#)
- [Library Catalogs](#)
- [Newspapers](#)
- [Quick Facts and Reference](#)
- [State Agencies](#)
- [Statistics and Datasets](#)

Making a selection from this list will reveal various databases and websites for further searching.

“Databases A-Z”

If you know the name of a specific database and wish to search it directly, click on “Databases A-Z” and type in the name of the database.

Alternately, if you’re not sure of the database name, you can use a keyword to search for a database. For example, if you search the word ‘business’ you could find the ABI/INFORM Complete or Business Source Complete databases to search.

“Journals A-Z”

If you wish to find articles in a specific journal or newspapers, click the “Journals A-Z” tab and enter a search term to locate a journal. Example: searching the term ‘economist’ will yield the following result:

Journal title	ISSN	Holdings	Find Print/ Capture URL
The American economist	0569-4345		
Blue chip economic indicators	0193-4600		
Business Africa	0968-4468		
De Economist	0013-063X		
The economist	0013-0613		
Economist.com			
El economista de Cuba edición online	1682-0258		
The Engineering economist	0013-791X		
The petroleum economist	0306-395X		
PLATTS ENERGY ECONOMIST			
The Regional economist	1932-4707		

This listing allows you to go directly to [The economist](#) and search for articles – or you can view the current issue, which will already be in pdf format in GALILEO.

“Find a Cited Article”

If you have *part* of a journal citation, you can click this link to find the *complete* citation for your research: <http://www.galileo.usg.edu/scholar/emmanuelcollege/journals/cited-article/>
